ADHESIVO DE MESA (Printing Table Adhesive) Code ID. 9815

It is an aqueous product, white in mass and colourless when dry, that is applied with brush or doctor blade on the printing table to immobilize the clothing to print.

MODE OF USE

The adhesive is applied with doctor blade or brush, allowed to dry at room temperature or the drying is accelerated with hot air. Once dry it becomes colourless and acquires a permanent touch that allows the adhesion of the clothing.

IMPORTANT NOTE

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.
- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
