## **TEXTILE FILLER**

### **Code ID. 9830**

**The textile Filler is a water-based pink product. It is used for the retouching and lateral sealing of the frames for printing with water-based inks.**

**Optimal transparency (simplifies registration operations in the printing phase). Easy to apply.**

#### **MODE OF USE**

**The product is already ready to be used in its function. Apply with doctor blade or brush.**

#### **IMPORTANT NOTE**

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.
- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
