## **CAUSTIPLUS**

### **Code 9611**

CAUSTIPLUS is a product formulated for the cleaning and conditioning of metal frames (iron, aluminium) for subsequent gluing.

#### **MODE OF USE**

Apply CAUSTIPLUS with a spatula on the surface of the frame. Let the product act for a few minutes and then wash with plenty of water. Finally, rinse with 10% acetic acid solution.

#### **CAUTION**

CAUSTIPLUS is a highly corrosive product. Contains SODIUM HYDROXIDE. Rubber gloves and safety glasses (goggles) are recommended as they cause severe burns on the skin. In case of any eventuality, consults doctor immediately.

## **DISOLGEL**

### **Code 9612**

It is a gel, which combined with the CAUSTIPLUS in equal parts, eliminates ghost images and persistent residue of ink or emulsion in the mesh.

#### **MODE OF USE**

The mixture obtained from CAUSTIPLUS and DISOGEL is applied with a spatula on both sides of the fabric and allowed to act for 15 to 20 minutes. Finally rinse with plenty of water under pressure. Before re-emulsifying, it is recommended to wash the box with an aqueous solution of acetic acid, to neutralize the possible caustic residues. In practice, DISOGEL is used for hand washing in a first step and then using soap and water normally.

**C14**  
**Code 9620**

It is a mixture of solvents, very effective, and emulsifying with water that eliminates of fast and excellent form the dry and fresh residues of the inks. (Except two-component system).

**PRODUCT APPLICATION**

Apply C14 to both sides of the screen, then remove paint residue using brush, sponge or brush. Finally, rinse with water.

**IMPORTANT NOTE**

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.
- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
