NEGRO PARA PELICULAS (BLACK FOR FILMS) Code ID. 9815

Black for films is a black colour aqueous product. It serves to retouch films or to produce them manually.

MODE OF USE

The product is already prepared to be used in its function. Apply with brush directly on the film or vegetable paper. Allow to dry at room temperature or apply hot air to speed the process. Once dry it acquires an opacity that allows the serigraphic copy.

IMPORTANT NOTE

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.

- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
