SERIMATE INK SERIE 1000

It is a mineral turpentine alkyd ink, economical, matte and velvety finish. Its oxidation drying is relatively fast.

APPLICATIONS

Its greatest use is in the printing of Spun Bonded (non-woven fabric), paper and posters. It has good resistance to the weather and external agents.

COMPLEMENTARY PRODUCTS

Base estampado (Stamped base - Code 4010): is an emulsion made of synthetic resins that facilitates the penetration and runoff of the ink on the substrate, replacing the function of a transparent varnish, which is not available in product line. The mixing ratio is very wide, and allows achieving four-color processes.

SPECIFICATIONS

Dilution: is used Retardant 140 (Code 9140) or in its absence mineral turpentine.

Meshes: we recommend for wide areas the use of open meshes, between 60 and 80 threads / cm. For fine details, use meshes between 90 and 120 threads / cm. A good conservation of the mesh is achieved by cleaning it immediately after the work is completed, thus preventing the ink remains hardened.

Drying: occurs by oxidation in a period of 20 to 25 minutes.

Colour range/Code	Description
1010	White
1020	Lemon yellow
1023	Chrome Yellow
1040	Colourless / Clear
1531	Fluorescent Yellow Lemon
1532	Fluorescent Orange
1535	Fluorescent Fuchsia
1536	Green Fluorescent
1050	Orange
1052	Red
1070	Royal blue
1072	Ultramarine Blue
1090	Black

IMPORTANT NOTE

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.
- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
