TINTA UV RS BLANCO / UV Ink RS White **CODE ID. 21011**

DESCRIPTION

It's rotary screen printing ink, drying by ultraviolet radiation with a great covering power and fast curing. It's designed for a wide variety of substrates.

CURING

This line of inks is formulated for speeds of cure between 20 and 60 m / min.

STORAGE

Store in a place protected from light and in black polyethylene containers, because exposure to light causes the polymerization of the ink. The containers should be closed very well, and immediately after using the inks. To maximize shelf life, the storage temperature should be 10 ° C to 25 ° C (50 ° F - 77 ° F). The stability of the ink is one year, fulfilling the mentioned requirements.

SAFETY

Contact with skin may cause irritation, in this case wash with plenty of water and soap. Wear gloves and eye protection. Change contaminated clothing and consults a physician.

OBSERVATIONS

We always recommend always carrying out preliminary tests to determine the suitability of the inputs and processes. Our technical department is available to respond to the respective concerns.

COLOURS

21011 White

IMPORTANT NOTE

- I. The inks formulated by Pintesint SAICyF must be used exclusively with the solvents and the complementary products that it manufactures for that purpose. Due to the diversity of products in the market, the company is not responsible for the use of the same from another source.
- II. The suggestions and data of this literature were elaborated in good faith, to guide the user. We recall the importance of checking the adaptability of inks and complementary products by testing before starting production. Due to the fact that the conditions of use of the products are not under our control, the present does not constitute a guarantee on the work to be done.
